## CUMULATIVE INDEXES

Cumulative indexes are available for *Physics Abstracts*, *Electrical & Electronics Abstracts* and *Computer & Control Abstracts*, for both

authors and subjects. These cumulations generally cover a period of four years, with the exception of *Computer & Control Abstracts*

where the initial volume covered the period 1966-68. The table below shows the prices and periods for the two types of cumulative index.

	PHYSICS ABSTRACTS		ELECTRICAL & ELECTRONICS ABSTRACTS		COMPUTER & CONTROL ABSTRACTS

## OTHER INSPEC SERVICES

### SDI

(Selective Dissemination of Information.)

This is a service individually tailored to the requirements and interests of the engineer or research worker. Every two weeks details of information relevant to the interest profile of the individual subscriber are selected from the data being processed for the INSPEC Database.

### TOPICS

This is an SDI service based on standard profiles. There are over 80 subjects covering high-activity areas of research and development. This is an inexpensive service designed to alert engineers and researchers to the availability of literature within their subject area.

### TAPES

The INSPEC Tape Services contain all the information included in the INSPEC publications. They are updated 50 times per year. They enable the larger research and development organisations to produce their own internal information and current-awareness services.

# The emIS Datareviews Series of Books

These publications are collections of articles specially written by the world's leading experts in semiconductor materials research. They cover the properties of the most widely used, and up and coming materials. The information is considered the most current and up-to-date which has been verified by those researchers at the forefront of technology. Each book is highly structured and has a comprehensive subject index.

**Current Books in the series are:-**

**Amorphous Silicon  
Gallium Arsenide  
Mercury Cadmium Telluride  
Silicon  
Lithium Niobate  
Indium Phosphide**
